	Application No.	Applicant(s)	
Notice of Allowability	10/804,160	BOHNERT ET AL.	
	Examiner	Art Unit	
	Jimmy Nguyen	2829	
The MAILING DATE of this communication appears on the cover sheet with the correspondence address All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS. This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.			
1. This communication is responsive to <u>amendment 3/19/04</u> .			
2. The allowed claim(s) is/are 1 - 15.			
3. \boxtimes The drawings filed on <u>19 March 2004</u> are accepted by the	Examiner.		
 4.			
 Attachment(s) 1. ☑ Notice of References Cited (PTO-892) 2. ☐ Notice of Draftperson's Patent Drawing Review (PTO-948) 3. ☑ Information Disclosure Statements (PTO-1449 or PTO/SB/0 Paper No./Mail Date 0304) 4. ☐ Examiner's Comment Regarding Requirement for Deposit of Biological Material 	5. ☐ Notice of Informal F 6. ☐ Interview Summary Paper No./Mail Da 7. ☐ Examiner's Amenda 8. ☑ Examiner's Statema 9. ☐ Other	(PTO-413), te ment/Comment	·

Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

The prior art of record are silent on the combination of an electro-optical voltage sensor and the method for measurement of an electrical voltage V, the voltage V being present between two electrodes, and generating an electric field, the electrodes, being arranged in a manner spaced apart from one another, and an electro-optically active medium being arranged between the electrodes, into which medium light can be radiated, it being possible to influence the state of polarization of said light in the electro-optically active medium by means of the electric field and to detect it after emergence from the electro-optically active medium, it being possible to determine the voltage V from the detected state of polarization, wherein a distance medium is arranged between the two electrodes, the electro-optically active medium being arranged with an effective thickness d1 and the distance medium with an effective thickness d2 between the two electrodes, and the effective thicknesses d1, d2 being chosen in such a way that temperature influences on the detected state of polarization of the light are essentially compensated for

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled ""Comments on Statement of Reasons for allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jimmy Nguyen whose telephone number is (703) 306-5858.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 305-4900.
